

## Group 3200\_21

# Minutes of Meeting 5

19/08/2026

Present: Christo, Dylan, Lithasa, Dhava, Murphy

Apologies: Terry

Absentees:

Meeting Start: 12.55pm

Meeting End: 1:30pm

| Time: | Item # | Topic:                 | Details:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          | Action: |
|-------|--------|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------|
| 12:55 | 1      | Demo                   | Demonstrated gesture recognition prototype<br>Demonstrated person identification                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |         |
| 13:00 | 2      | Feedback               | <p>Next step is to link velocity with gesture<br/>Move: maximum velocity is ~0.3 - 0.5ms<br/>Turn: max velocity is ~0.3-0.5ms<br/>Have to limit speed for safety<br/>Lock velocity to one direction, one gesture locks any other movement (can't execute two commands at the same time)<br/>One gesture for one command</p> <p>Get mujoco up and running. Search unitree on github.</p> <p>Person identification:</p> <ul style="list-style-type: none"><li>- Measure dimension of the joint</li><li>- Ensure degree of freedom matches the robot: 3D for shoulder, 1D for elbow, 3D for wrist</li><li>- Read all of the joints and map it to the mujoco robot simulation</li><li>- If done correctly, robot simulation should perfectly mimic your actions from the webcam.</li><li>- Limit joint velocity and joint angle of movement (check limitations and other info online for model: URDF model)</li></ul> |         |
| 13:25 | 5      | Tasks for next 2 weeks | <p>Get everything linked to mujoco by week 7 9<sup>th</sup> of September<br/>Both teams linking their project to separate mujoco simulations, no need to combine yet.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |         |
| 14:00 | 6      | Meeting end            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |         |
