

GROUP 21

CITS3200 PROFESSIONAL COMPUTING

CLIENT MEETING 1 AGENDA

Time: 1:30pm

Date: 30/07/2026

Venue: EECE 3.13

Tasks	Sub-tasks
Introductions	Introduce selves.
Discussions/ Clarifications	• What would Oliver and Adrian like to know about us before we begin? • Group questions and clarification: ○ Talk through what the project / product is, what it will achieve and how it would ideally function. ○ What would a finished version of the product look like? ▪ Any specific features at this point? ○ Who would be using this product and who are the ‘clientele’? (Staff or public customers?) • Development clarification: ○ What milestones would you be looking out for during? (i.e. a first ‘draft / proof of concept’, a certain action the robot will complete, body language recognition, etc.) ○ Does the coding language used affect anything on the client side? (Regarding the two different SDK versions [Python vs C++]) ○ Ubuntu 20.04 support and development. (“Development on Mac and Windows systems is currently not supported”)
To Do	• Relay information back to rest of team (Christo) • Share meeting minutes with everyone (Christo) •

Next Meeting	•
